Education

University of Pisa

Pisa, Italy

MSc in Artificial Intelligence

September 2021 – **Currently**

BSc in Computer Science

September 2015 – October 2021

Main subjects: software design and development, artificial intelligence principles, design and implementations

Publications

Continual Learning for Human State Monitoring

[arxiv](#)

Federico Matteoni, A. Cossu, C. Gallicchio, V. Lomonaco, D. Bacciu.
ESANN, 2022

Experiences

Garmin Italy Technologies

Massarosa, Italy

Software Engineer

June 2022 – **Currently**

Currently working on the Boating app on Android/iOS platforms, using Kotlin and Swift as well as Java, Objective-C and C++, and frameworks like Jetpack Compose. Developed AI models from scratch with legacy data for internal AI-based tools, curating every step from design, to dataset processing, to model training and evaluation.

Alfa Service

Lucca, Italy

Computer Technician Apprenticeship

April – October 2017

In-lab computer maintenance, and interfacing with corporate and private customers regarding remote software updates. Also experience in managing storage and designing solutions for customers.

Latest Projects

Pinball on Android

[GitHub](#)

Porting of a classic Pinball game on Android, built with the SDL library and leveraging the JNI tools.

Caput Draconis Duels

[Play Store](#), [App Store](#)

Android/iOS app built with Kotlin Multiplatform, made in collaboration with a cultural association.

Tech Skills

Programming Languages

10+ years experience with: Java, Python, C, C++, SQL, Javascript, and others.

5+ years experience with: Kotlin

3+ years experience with: Swift, Objective-C, C#

Technologies and Environments

15+ years experience with Windows and GNU/Unix, both usage and app design and development.

13+ years experience with Android, both usage and app design and development. Experience with Jetpack Compose, Kotlin Multiplatform, Firebase, Room, networking and more, as well as design patterns like MVVM and MVC.

3+ years experience with iOS app development, with SwiftUI, UIKit and Foundation frameworks.

Artificial Intelligence

Enterprise experience in developing AI models from scratch, dealing with legacy data, in all design and development steps: from concept and dataset preprocessing, to training and finetuning, to evaluation and usage.

Experience with popular Machine Learning libraries (TensorFlow, PyTorch, Avalanche)

Other Tech Skills

Personal experience in game design and development.

Always up-to-date with novel technologies, ideas and news: daily I listen to tech podcasts and read tech-related newsletters and forums.

Soft Skills

I am a good team player, able to handle very different personalities from mine and always ready to find the common-ground that points to the best course of action.

I put lots of effort in documenting and streamlining workflows, taking time to write down undocumented processes, as well as finding ways to improve efficiency: I often build small tools to help colleagues in their tasks.

I don't shy away from expressing my point of view on things, and appreciate when others do the same: discussing different ideas is the best approach in finding the best solutions.

Experience in preparing and giving tech talks on topics that I've familiarity with, in both english and italian languages.

Languages

Italian (native)

English (C2)

Other Interests

I am an avid reader of all kinds of books, from essays to fiction and comics. I also love photography, and have been an hobbyist photographer since about April 2020 ranging from portraits to astrophotography. I am an amateur astronomer since I was little and I never miss a space-related event, closely following both space-travel developments as well as space-related discoveries and developments.
